

Approaching AI

2024-02-13 - 2024-05-01

With this exhibition I would like to approach AI. We know that AI is getting better and better and will soon overtake us in terms of thinking. What will this mean for us? I would like to ask a few questions about this.

This exhibition shows the photos of the sculptures as this is the best way to display the sculptures in this gallery. Depending on the sculpture, the wooden heads shown can represent both AI and humans. Maybe AI and humans will merge in the near future anyway.
